

## Meetings for the 2018 season of the Geology Section of the N.N.H.S.

Welcome to the 2018 series of lectures, field visits, and practical activities of the NNHS geology section. We take a particular interest in the geology of Northamptonshire and our neighbouring counties. Our monthly meetings also cover the broad range of geological themes. The Society has a wonderful collection of mineral specimens which are a resource for our meetings, and is also custodian of the fossil collection of Walter Crick.

Our meetings are normally held on the third Thursday of the month at 2.30pm and talks for the coming year include the Whin Sill, karst scenery, Jurassic fossils with a field visit to the Wembley ironstone quarry at Irchester Country Park. We have an evening meeting looking at some of the stones used in the buildings of Northampton Town Centre.

We welcome everyone with an interest in geology from those with no prior knowledge to those with a specialist interest.

The Geology Section is one of ten sections that make up the NNHS. The society has its own rooms and laboratory located near the centre

of Northampton, near the Derngate & Royal. Over 250 meetings, walks and visits are held throughout the year, arranged by the different sections of the society. Membership covers

all NNHS meetings, visits and events. (3)
